“AbilityOne provides quality and reliability and responsiveness, and as long as I’ve been associated with AbilityOne, I’ve never seen anything but that.”

- Ron Fiorani, Small Business Specialist, U.S. Army Tank Automotive and Armaments Command, Warren, Michigan

## Supplied and equipped, in the air and on the ground.

For more than 30 years, Federal and Department of Defense customers have relied on the AbilityOne Program for aircraft, vehicular and electrical parts and supplies to maintain equipment around the world. From complex hydraulic/mechanical assemblies to simple spare parts, AbilityOne has the experience and responsiveness to keep our nation supplied, equipped and protected.

Through our national network of nonprofit agencies, AbilityOne meets Federal product sourcing requirements while creating employment opportunities for people who are blind or have other significant disabilities. Orders for supplies and spare parts are managed through a contract management support team, and allocations are assigned to the appropriate manufacturer to assure timely delivery of high quality products. The AbilityOne Network has extensive third party logistics capabilities in a variety of lines of business and is poised to be your warehousing and distribution solution.

The vehicular, aircraft and general industrial components we supply include:

- Diesel engine glow plugs
- Gaskets and O-Rings
- Vehicular seats and safety belts
- Clamp loops
- Strap assemblies
- Cargo and webbing straps
- M16 30-round magazines
- Safety lighting kits
- Light markers
- Non-rechargeable batteries
- Sand bags
- Injection molding products
- Metal and plastic parts

The AbilityOne Network utilizes state-of-the-art equipment and inspection systems, including ISO 9001 certified and/or equivalent quality systems. Our quality control and best practices ensure the highest quality products for our Federal customers while providing exciting manufacturing career opportunities for people with significant disabilities.

## CUSTOM MANUFACTURING, DEVELOPMENT & FULFILLMENT

The AbilityOne Network has diverse prototyping and fabrication capabilities to meet our customer’s custom requirements. Whether long - or short-term production runs, in large or limited quantities, our national network of nonprofit agencies possess diverse manufacturing and fabrication capabilities, including:

- **Manufacturing** – Machining of complex parts according to customer drawings and military specifications. Our skilled manufacturers are capable of working with a wide range of materials including:
  - Sheet metal
  - Plate and bar stock
  - Castings and forging
  - Aluminum extrusions
  - Gaskets and seals (metallic and non-metallic)
- **Finishing** – Metal finishing, such as painting, anodizing, penetrant inspection, shot peening and polishing
- **Assembly** – From minor installation of bushings and bearings, to complex hydraulic and mechanical sub-assemblies
